**ABSTRACT**

**Propulsion System for a Scientific Micro/nanospacecraft**

**Authors: J. Lewis, G. Yankura**

**Jet Propulsion Laboratory, Pasadena, CA 91109-8099, USA**

A preliminary propulsion system design for a 10-50 kg micro/nanospacecraft for generic scientific missions is described. The design drivers resulting in this proposed system are discussed as well as current technology developments.
