

MULTI-MISSION SUBSYSTEM ANALYSIS TOOLS

Subsystem simulations that provide fast, accurate results at a level of fidelity appropriate to each stage of the project lifecycle

- Supports a wide variety of mission types, mission phases and hardware configurations throughout a project's lifecycle
- In many simulation environments:
 - stand-alone application
 - as a library
 - distributed simulation
- On multiple platforms:
 - Windows NT, 2000
 - Solaris 8
 - Linux

*Easy-to-use, intuitive GUI
Fully parameterized and
easy-to-integrate*
